

Paper Saving Boxes

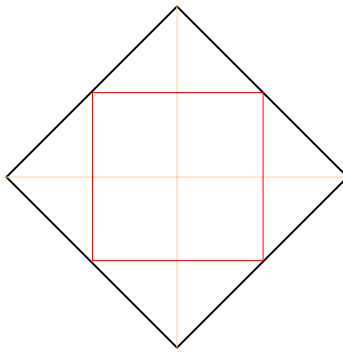

Fold square diagonally into a triangle

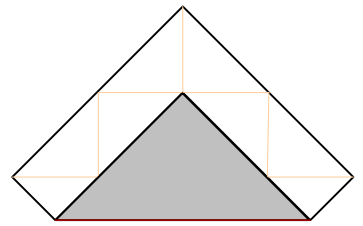

Fold all 4 corners in toward the centre and undo

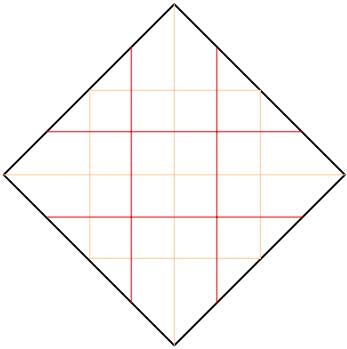

Do you see the square in the middle?

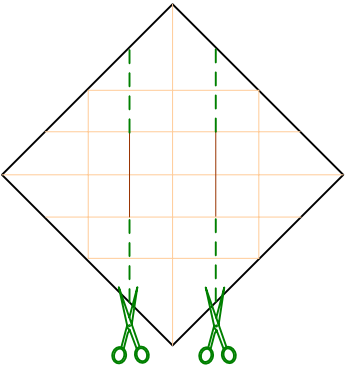

Fold all 4 corners to the folding edges on the opposite side and undo

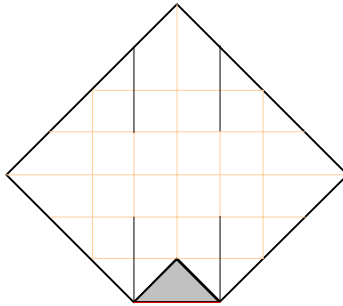

Now the square has many little squares

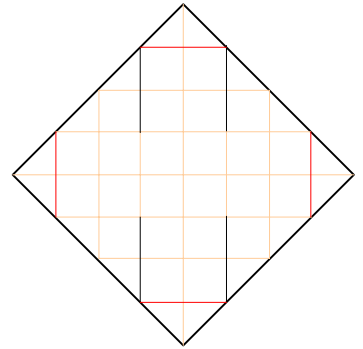

Cut 4 times on the right and the left right to the square in the middle

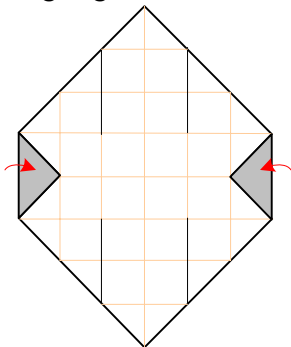

Fold the 4 corners to the folding edge above and undo

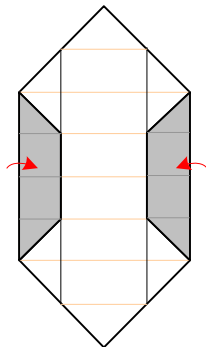

Now it should look like this :)

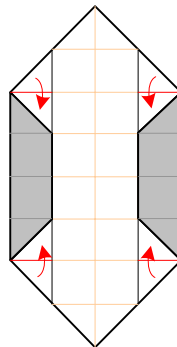

Fold the left and right corner to the first folding edge

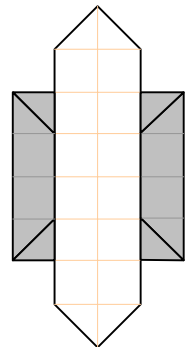

And once again right to the second

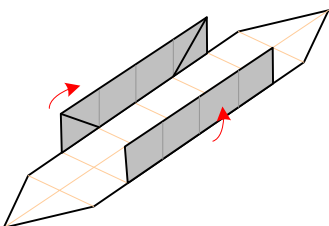

Fold the cut triangles to pair with the sides

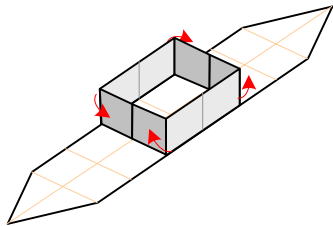

Now you are almost done :)

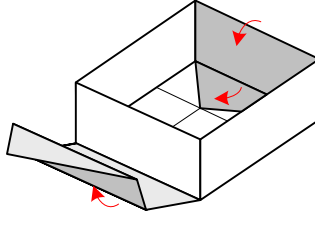

Tip the sides upwards

Collapse the flaps from the side

And fold the two pointed sides inwards

Done! :)
